

Pro-XMP Extrusion Welder

Medium output extrusion welder for production welding of geomembranes and rigid thermoplastics.

The PRO-XMP Extrusion Welder, manufactured by DEMTECH Services, Inc., is the latest in a long line of high-quality extrusion welders for detail and medium production welding of thermoplastic liners, pipe, and rigid sheet stock as well as many other plastic welding applications. Drawing from many years of experience in the plastic welding industry, we've designed features and functions into its design to satisfy the needs of the most demanding welding technicians.

Pro-XMP Features:

- Powerful Milwaukee brand drive motor well known for reliability
- Reliable, easy to set Watlow temperature controllers
- Easy to use heater on/off controls
- Bright LED headlights light-up work area in front of welding shoe
- Electronic "cold start" protection prevents starting of motor before minimum operating temperature is reached
- Demtech's exclusive integral pre-heat air blower heating system. Not just a hot air welder mounted on top
- Small diameter but long barrel/pre-heat design for easy welding access to tight spaces
- Ergonomic handle adjusts easily with a twist to different positions for right-handed or left-handed operation
- Handle doubles as a kickstand, making it nearly impossible to tip welder over. No separate stand needed
- Non-twisting rod feed design makes it easier to manage welding rod. Works with 4 or 5mm rod
- Welding shoes are available in Demtech's pre-machined design or blanks
- Welding shoe rotates 360° to weld in any direction
- Lightweight... Reliable... Affordable
