**SPREADER-BAR IN ACTION**

**SPREADER-BAR IN ACTION**

---

## **Spreader-Bar Features**

- Strength, The Spreader-Bar is designed to carry up to 4,500lbs and tested to 9,000lbs.
- Easy, simple assembly ensure minimal training and efficient operation.
- Lightweight, Aluminum missiles provide a strong lightweight interface with your roll.
- Versatility, able to carry rolls of all different lengths and sizes across the entire jobsite.
- Rigidity, a strong beam minimizes the lift distance needed to hold the roll steady.
- Steel braces provide support while loading and unloading heavy rolls.
- Tested, every Spreader-Bar is thoroughly tested prior to being shipped.
- The Spreader-Bar works great alongside Demtech's sheet deployment Winch.
- Designed and Manufactured in the U.S.A.!
