

Manometer Air Pressure Tester Kit

The easy to use system for air pressure testing of geomembrane seams

Manometer Kit AT-100KIT/A Features

- Simple to operate, Accurate, Low maintenance, Cost Effective
- Exclusive shut-off valve prevents possible leakage through the air filler valve
- Low-cost Standard replacement needle with sharp pointed tip and crosshatch hole
- Accurate 0-60 PSI gauge with easy to read graduations
- Air Test Clamps quickly seal the ends of air channel securely, eliminating the need for a heat gun or torch
